The oxygen treatment of Intraceuticals is a new therapy that fades wrinkles and lines within 6 weeks and visibly improves the skin without needles, injections or pain. The serums contain ingredients including hyaluronic acid, a natural component of our skin, as well as vitamins and powerful anti-oxidants.

What is hyaluronic acid?

Hyaluronic acid that occurs naturally in the skin. As we get older, less is produced. Hyaluronic acid ensures that the skin can retain moisture. Moisture is essential for healthy, glowing, resilient and firm skin.

After thorough cleansing, your face is treated with the O₂ Intraceuticals Infusion. A fine treatment that feels like a cool massage. The active ingredients and the oxygen are brought into the skin by osmotic pressure (3.5 bar).

PHOTONLASER

Photonlaser is the most innovative method for a cosmetic lift without surgery for face and body. The method is based on the ancient principles of acupuncture, combined with the very latest laser technology. Using a diode laser, energy is applied to the skin tissue at certain (acupuncture) points, with the result that this repairs itself optimally, softening wrinkles and creating an immediate lifting effect. Unlike many existing laser techniques, the treatment is entirely safe and painless and does not damage the skin.

At Beauty Oranje, the photonlaser treatments are given by a professionally trained team. The method can be used as a solution to many problems of the face and body. It stimulates and revitalises the facial skin, making it resilient, young and radiant. With this method, even loose cheek and eye contours, moisture accumulations, pigment spots and scars in the face can be visibly improved.

All Photonlaser treatments can be reserved separately or in the form of a laser cure for an optimal result. All facial treatments with Photonlaser are carried out in combination with products from the La Prairie cosmetics house.
